Professional Summary

Computer Science undergraduate passionate about Artificial Intelligence, Full Stack Development, and Generative AI applications. Experienced in building AI-powered web applications, conversational dashboards, and scalable full-stack systems using Python, React.js, Node.js, and modern AI tools. Hackathon winner with strong analytical thinking, leadership, and problem-solving skills.

Education

Bharat Institute of Engineering and Technology

2024 – 2028

B.Tech in Computer Science and Engineering

Hyderabad, India

Relevant Coursework

- Data Structures
- Machine Learning
- Artificial Intelligence
- Database Management
- Operating Systems
- Web Development
- Computer Networks
- Software Engineering

Experience

Google Gemini Student Ambassador

Jul 2025 – Present

Rising Star Recognition (Top 250)

Remote

- Promoting AI-focused initiatives and modern developer technologies through community engagement.
- Exploring Google AI ecosystem including Gemini and Generative AI tools.
- Conducting awareness and learning activities related to AI and technology.

ML Data Analyst Intern – Student Tribe

Dec 2025 – Jan 2026

Machine Learning & Data Analysis Intern

Hyderabad

- Annotated and processed 5,000+ data samples for machine learning workflows.
- Improved dataset quality through validation and preprocessing techniques.
- Supported AI model workflows through structured data handling and analytics.

Campus Mantri – GeeksforGeeks

Jan 2026 – Present

Community Lead

Remote

- Organized technical events, hackathons, and coding initiatives for students.
- Promoted developer communities and student engagement activities.

Projects

InsightAI – Conversational Business Intelligence Dashboard | *React.js, Node.js, Gemini API*

2026

- Built an AI-powered dashboard enabling users to analyze data using natural language queries.
- Integrated Gemini API for conversational analytics and intelligent insights generation.
- Implemented real-time dashboard updates, automatic chart generation, and data visualization.

VoteSaathi AI – Election Assistant Platform | *React.js, Express.js, Tailwind CSS*

2026

- Developed a full-stack AI-powered web platform for election awareness and voter guidance.
- Integrated chatbot workflows and responsive frontend interfaces.
- Built API-based features and scalable application architecture.

Technical Skills

Languages: Python, JavaScript, TypeScript, C, C++, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS, Bootstrap
Backend: Node.js, Express.js, FastAPI
AI / ML: Artificial Intelligence, Machine Learning, Deep Learning, Generative AI, NLP, Computer Vision, OpenCV
Libraries: Pandas, NumPy, TensorFlow
Databases: MongoDB, Firebase, Supabase
Developer Tools: Git, GitHub, Docker, Postman, Jupyter Notebook, VS Code
Cloud & Deployment: Netlify, Vercel, Cloud Computing
Core Concepts: REST APIs, API Integration, Full Stack Development, Data Analysis, Data Visualization

Achievements

Hackathon Winner – GeeksforGeeks HackFest	2026
<i>AI & Full Stack Development</i>	<i>India</i>
GSSoC 2026 Contributor	2026
<i>Open Source & AI Agents Track</i>	<i>Remote</i>

Certifications

- Application of Artificial Intelligence and Machine Learning
- SaWiT.AI Challenge – Certificate of Completion
- SIH 2024 Internal Hackathon – Participation
